Subject: **Awid fw update to e.g. 2.13Ra – I/Q4.13**

Regular update via standard interface or via stand alone

_____

Regular update via standard interface

Need to download 3 files (via any interface possible)

1. Main reader firmware to 2.24 (US) / 2.11B (EU) update

file „**Fw_mpr_1580hr_213ra.ihb**"
(„pages 1… 250" are displayed from printer during update, takes appr. 10 … 15 minutes)
Display shows: „Update Done. Wait. for data": Ignore this message and continue with next step   „I-Chip…"

2a. I-chip firmware to 4.03
file   „**I_IQ_413.ihb**"   (appr. 75 „pages", takes appr. 3 minutes,)
„Update Done. Wait. for data" can be ignored. Turn power off, then ON.

2b.Turn OFF/ON (Use Power switch, a RESET isn´t sufficient) is necessary !!

3. Q-chip firmware to 4.03
file „**Q_IQ_413.ihb**" (appr. 75 „pages", takes appr. 2…3 minutes,)
 „Update Done. Wait. for data" can be ignored. Turn off, then ON, Update is complete now!

Finished!

RFID fw update via Card possible?

Yes, the upgrade can also be done via card! The ".ihb"-files are also shown in Standalone mode (like the .for and the .s3b)
