NOVEXX Solutions presents the versatile XLS 2xx Labeling System

XLS 2XX - THE HIGH PERFORMANCE LABELING SYSTEM FOR EVERY INDUSTRIAL REQUIREMENT

Eching, July 2019 – For food, beverages, personal care, pharma or chemical products – the new developed, multifunctional XLS 2xx Labeling System manages every industrial labeling requirement. Various configuration options and a large selection of features ensure maximum flexibility – for continuous operation and maximum production line uptime. User-friendly features such as a large colour display and the new Easy Push Rewinder for an easy handling of labels complete the new development. And additionally the device is more compact than ever before.

The XLS 2xx Labeling System- Family offers a wide range of solutions for small to extra-wide labels, from low to high speed labeling. Whatever labeling requirements exist, the new labeling system can cope with any scenario: The XLS is the choice for applying all kind of labels and label shapes: from decorative to promotional, nutrition or warning labels.

The XLS 2xx Labelers convince with the following advantages:

Highest flexibility:

The XLS 2xx is prepared for every industrial labeling challenge. Both very small and extremely wide labels are applied with high accuracy, in every imaginable position.

Due to the modular design, the labeling system can be quickly and easily integrated into new and existing production lines. In addition, the XLS 2xx can be used in tandem mode for maximum uptime and productivity. Thanks to robust components, the XLS 2xx is reliable and needs limited maintenance.

User-friendly operation:

A large display with an icons-controlled menu ensures an intuitive operation. Thanks to different colored backlights, the machine status can be recognized at a glance. Another innovation is the Easy Push Rewinder, which allows easy and quick removal of label material. Therefore the handling is as user-friendly as never before.

Intelligent functions:

The XLS 2xx family is equipped with a range of intelligent features to make the labeling process even more efficient. The dispensing speed automatically adapts to the conveyor speed which increases the productivity and performance of the entire production line. Optionally, the labeling system can be combined with IP65 kits for use in humid or dusty environments. Thanks to this, the labeling system is also prepared for rough production conditions.

"The XLS 2xx is a powerful further development of our portfolio. The labeling systems are developed and produced in Germany and are of the highest quality," says Geert Jan Kolkhuis Tanke, Director of Product Management at NOVEXX Solutions. "It can handle any labeling challenge and efficiently applies labels to products, trays and cartons. Due to the many possible configurations, the XLS 2xx Labeling System Family is a real all-rounder - no matter in which industry it is used. The XLS 2xx keeps the costs for industrial labeling low and therefore it is the ideal labeling system for every production line. "
