

ALS 204 LABELING SOLUTION FOR TOP LABELING

Right Hand Version

DESCRIPTION

With this application, labels between 10 - 106 mm width (material width incl. backing paper max. 110 mm) can be applied on the top of products. The surface of the products needs to be flat to secure the smooth application of labels. Paper and stiff PE label materials can be used. The maximum apply speed is 40 m/min. The support stand with vertical and horizontal lead screws enables flexible integration onto a conveyor. The product start sensor has to be connected to the M12 plug on the ALS.

LABELS PER MINUTE (Q) FOR TOP LABELING ALS

EXAMPLES	PRODUCT LENGTH (P)	APPLY SPEED (V)			
		15 M/MIN	20 M/MIN	30 M/MIN	40 M/MIN
Products:	1. 60 mm long + product distance 20 mm (P)	188	250	375	500
	2. 100 mm long + product distance 20 mm (P)	125	167	250	333

As application-specific circumstances can impact the real volumes and apply-speeds, no rights can be derived from these calculations.

Calculation of max. labels per minute: $Q = V \times 1000 / P$
 Calculation of max. apply speed: $V = Q \times P / 1000$
